

## Education

*University of Washington, Data Science and Statistics, 2018 - 2019.*

### Relevant Courses:

- Computer Science: CSE 143 Computer Programming II, INFO 201 Technical Foundation, CSE 154: Web Programming, CSE 416 Introduction to Machine Learning, CSE 414 Introduction to Database Systems
- Mathematics: MATH 126 Calculus and Analytics Geometry III, MATH 324 Advanced Calculus, MATH 307 Introduction to Differential Equations, MATH 308 Matrix Algebra and Applications, MATH 309 Linear Analysis, MATH 394 Probability I

**Average GPA:** 3.97 (Cumulative)

*University of Maryland, Computer Science, 2020-2022.*

*Relevant Courses:* CMSC 132 Object Oriented II, CMSC 250 Discrete Structures (exempted)

## Awards and Competitions

### AIVIVN Sentiment Analysis Competition

Spring 2019

- Design a text classification system for positive v.s negative product reviews (in Vietnamese)
- Models: word2vec + weighted average of (hierarchical) self-attention neural network, residual network.
- Final Result: 1st Place in Public Leaderboard (F1: 0.90087) and Private Leaderboard (F1: 0.90012)
- GitHub Repository: [https://github.com/petrpan26/Aivivn\\_1](https://github.com/petrpan26/Aivivn_1)

### Emotion Recognition Competition 2019

Fall 2019

- Design a system to classify the emotion of the speaker from raw audio data
- Models: MFCC for preprocessing, convolutional neural network. Developed using the neural network toolbox (see below)
- Result: 8th place in the first round, invited to present in the second round.
- GitHub Repository: <https://github.com/nhatsmrt/erc>; Contest Website: <https://erc2019.com/>

## Main Projects

### Neural Network Toolbox

Summer 2019

- Implement common deep learning procedures and papers using PyTorch for quick prototyping and model developing.
- GitHub Repository: <https://github.com/nhatsmrt/nn-toolbox>
- Documentation: <https://nhatsmrt.github.io/nn-toolbox/>

### Arbitrary Style Transfer

Summer 2019

- Given an arbitrary content photo and a piece of artwork, transfer the style of the artwork to the photo.
- Based on Huang and Belongie's paper "Arbitrary Style Transfer in Real-time with Adaptive Instance Normalization"
- Implemented using PyTorch and my toolbox (see above).
- GitHub Repository: <https://github.com/nhatsmrt/torch-styletransfer>

## Experience

### Project in Mathematics and Application, Mentor

2017 - 2019

- Develop the curriculum, lecture on optimization techniques for neural networks, and supervise neural network projects for a selected group of 20-30 talented high school students from all over Vietnam.

## Skills

### Proficient With

1. *Java (3 years)*: Object Oriented Programming, Design Patterns
2. *Python(3 years)*:
  - Data Processing and Visualization with numpy, pandas, matplotlib

- Machine Learning and Deep Learning with Scikit-learn, Networkx, Tensorflow, Keras, PyTorch
3. *Relational DMBS and SQL*
  4. Data Structures and Algorithms

**Familiar With**

1. *Full Stack Web Development*: Server-side with Django; Client-side with HTML, CSS, JavaScript, ReactJS
2. *Database Technologies*: MapReduce paradigm, Spark, AsteriskDB and SQL++
3. *Others*: R (dplyr, tidyr, ggplot2, shiny), git
