

Dear Mr./Mrs,

I am Nhat Pham, a student at the University of Maryland, majoring in Computer Science. Before this, I studied for two years at the University of Washington, majoring in Data Science and Statistics. My main interest lies in solving challenging questions with algorithmic, data science and machine learning techniques. I am writing this letter to give you a better picture of my personal background.

Please allow me to briefly list my technical experience. At the time of writing this letter, I have 3 years of experience in using Python and Java, having taken several courses in them. In terms of Machine Learning and Deep Learning, I have won a sentiment analysis competition in Vietnam, placed 8th in another competition in emotion recognition from audio, and have completed several deep learning projects, such as transferring the style of one photo to another, or denoising dirty document photos. I have written a toolbox of common procedures and architectures for deep learning in PyTorch, which greatly speeds up my projects and attempts in competitions. I am comfortable with writing SQL queries, and I also have some experience with Web Programming in JavaScript.

For more details about any of the above, please take a look at my CV, which can be found on my personal website at <https://nhatsmrt.github.io/>. More projects can also be found on the website, along with their GitHub repository. I appreciate that you have taken your time to read this letter, and I look forward to working with you.

Yours sincerely,
Nhat Pham
